

**General Provisions.** Bills for sewer service shall be computed: (i) on the basis of the average amount of water used by the customer during the winter season based upon the average of the monthly readings of the customer's water meter for the preceding December, January and February; or (ii) on the basis of the customer's current monthly water bill, whichever is less.

Anything herein to the contrary notwithstanding, no charge for wastewater service shall be made based on water used as a result of a Special Connection for water authorized pursuant to the Rules.

If a residential customer does not have an acceptable history of water usage during the preceding December, January, and February, the customer's monthly sewer bill shall be calculated based upon (i) the customer's current monthly water usage; or (ii) on the basis of 8,000 gallons water usage per month, whichever is less.

If a nonresidential customer does not have an acceptable history of water usage during the preceding December, January and February, the customer's monthly sewer bill shall be calculated based upon the customer's current monthly water usage.

A customer may elect to have his bill paid by bank draft beginning at such time the District's representative has installed computer software to initiate such a program on behalf of the District. The District's representative shall provide necessary applications for the customer's authorization to pay his bill by bank draft. At any time should the customer's bank refuse payment, the customer will be notified in writing to make payment directly to the District.
